Things to know about Land Rover Defender 2015

 AI generated

The 2015 Land Rover Defender is a versatile and rugged SUV that offers a range of engines and body types to suit the needs and preferences of different drivers. Let's take a closer look at the various options available:

Engines: The Defender comes with a choice of three engines. The first is a 2.2-liter four-cylinder diesel engine that produces 122 horsepower and 265 lb-ft of torque. This engine is paired with a six-speed manual transmission and comes standard on all models except for the top-of-the-line Autobiography edition.

The second option is a 2.4-liter diesel engine that generates 120 horsepower and 266 lb-ft of torque. This engine is also paired with a six-speed manual transmission and comes standard on the Autobiography edition.

The third engine available for the Defender is a 4.0-liter V8 gasoline engine that produces 182 horsepower and 233 lb-ft of torque. This engine is paired with a four-speed automatic transmission and is only available on the Autobiography edition.

Body Types: The Defender is available in two body styles: a two-door, short-wheelbase model, and a four-door, long-wheelbase model. The short-wheelbase model has a total length of 152.8 inches, while the long-wheelbase model is 187.3 inches long.

Other Specs: The Defender can be equipped with a variety of features, including off-road capabilities such as a locking rear differential, hill descent control, and terrain response technology. It also offers seating for up to seven passengers, depending on the configuration.

Overall, the 2015 Land Rover Defender offers a range of options to suit different needs. Whether you want a diesel or gasoline engine, a two-door or four-door model, or off-road capabilities, the Defender has something for everyone. Its rugged and capable design makes it a popular choice for those who want a reliable SUV that can handle tough terrain.

Has this vehicle been damaged in the past? What was the value of the damages?

No damage records found

Damage records

✓ No damage found

Occasional inaccuracies can occur, especially when checking older vehicles. Illegitimate mechanical garages may illegally disguise vehicle defects or damages, not recording their existence anywhere. Sometimes, even vehicle VIN plates may be replaced. We have a variety of methods to detect even such crimes, but it's impossible to provide a 100% guarantee.

The timeline of records for this vehicle

Latest records

2015-01

 **Country unknown**

Was manufactured

The country indicates either the location of manufacturing facility, assembly plant or registration address of the manufacturer. The date may be approximate.

2015-03

 **United Kingdom**

Was registered

The record represents an administrative event. This could be related to a change of ownership, documents, etc

2017-08

Had licence plate changed

This vehicle's licence plate has changed.

From: **X8CJH** To: **WU15CAV**

2017-09

Ownership changed

The country indicated the geographical location of a documented ownership change or renewal. Please note that some changes may be formal, e.g., end-of-lease transfers and similar.

2018-08

Was inspected

A technical inspection event (also known as an MOT, roadworthiness test or emission control test) has been recorded. Both successful and failed instances may be included.

2019-09

Was inspected

A technical inspection event (also known as an MOT, roadworthiness test or emission control test) has been recorded. Both successful and failed instances may be included.

2020-09

Failed a technical inspection

A failed technical inspection (MOT) was recorded in the indicated country. Unsuccessful emission tests will also fall under the same category.

- Windscreen washer jets misaligned and not providing sufficient fluid to the windscreen (3.5 (a))

2020-09

Was inspected

A technical inspection event (also known as an MOT, roadworthiness test or emission control test) has been recorded. Both successful and failed instances may be included.

2021-10

Was inspected

A technical inspection event (also known as an MOT, roadworthiness test or emission control test) has been recorded. Both successful and failed instances may be included.

2021-10

Was on sale

This record was created because the vehicle was listed for sale on a certain marketplace. Sometimes the vendor's country overwrites the vehicle's actual location.

2022-01

Ownership changed

The country indicated the geographical location of a documented ownership change or renewal. Please note that some changes may be formal, e.g., end-of-lease transfers and similar.

2022-09

Was inspected

A technical inspection event (also known as an MOT, roadworthiness test or emission control test) has been recorded. Both successful and failed instances may be included.

2023-06

Ownership changed

The country indicated the geographical location of a documented ownership change or renewal. Please note that some changes may be formal, e.g., end-of-lease transfers and similar.
